

WARREN BROWN

ARC INDUSTRIAL, GENERAL MANAGER

PROFILE

More than 34 years of experience in operational management, strategic planning and safety in hazardous waste management, construction and contract administration. As a member of senior executive teams and general management in the environmental services industry, Brown specializes in the scaffolding, asbestos/lead abatement and demolition industry with leading national enterprises.

CAREER

MANAGEMENT

Brown came to ARC in 2016 with experience in marketing, client relations, strategic negotiations and overall cost control. He has strong team-building, leadership, motivation and communication skills, coupled with insight into emerging opportunities, trends, issues and challenges in the industry.

Brown is recognized for sound fiscal and operational management, strategic planning and safety, resulting in enhanced profitability, reduced costs and optimized shareholder value.
